Allowable Subject Matter

Claims 1-6, 8-16, 18-26 and 28-30 (renumbered 1-27) are allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to fairly suggest the claimed invention of exception making in binary code translation. Specifically, claims 1, 11 and 21 are directed to determine translation code block to use as translated code based on exception mask, executing the translated code in the target architecture and then exception is raised while executing if any exception is determined. Therefore, the claimed invention improves the binary

translation process and provides an accurate exception handling in the translated code, which may be difficult when the source and target architectures have different execution models.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
